## WORK EXPERIENCE

---

### **RocketPlan Technologies Inc.**

**July 2021 - December 2021**

#### *Frontend Developer*

- Delivered responsive components, features, and functionalities for a user-friendly web application.
- Performed code reviews, refinement, and debugging.
- Implemented and maintained codebase by following code standards.
- Participated in daily stand-ups and weekly sprint planning/retrospectives.
- Collaborated with designers, QA, and developers to ensure efficiency within the team.

### **Unified Systems Inc.**

**June 2020 - July 2021**

#### *IT Support Technician*

- Assisted clients with troubleshooting and diagnosis of software and hardware issues.
- Performed factory acceptance testing for servers, workstations, switches, routers and IP cameras, printers and mobile phones for various companies.
- Provided technical and customer support, and created service calls.
- Responsible for creating, deleting, and maintaining user system accounts and passwords.
- Responsible for documentation of IP addresses, model numbers, serial numbers, login credentials, client information, and specific location of devices.

## EDUCATION

---

### **Kwantlen Polytechnic University, Surrey, BC**

**Sept 2016 – May 2020**

- Bachelor of Technology, Major in Information Technology

## TECHNICAL SKILLS

---

- Programming languages: ReactJS, NextJS, JavaScript, C#, Java
- Software: Visual Studio Code, GitHub, Jira, Active Directory, Visual Studio, NetBeans, Android Studio, Unity
- Platforms: Windows, Mac OS, Linux, Android, iOS

## PROJECT EXPERIENCE

---

### **3D FPS Game**

**Sept 2019 – May 2020**

#### *Integration Project*

*KPU, Surrey, BC*

- Developed a 3D video game in a first-person perspective using Unity and C#.
- Designed unique levels with functional AI-controlled enemies.
- Debugged and modified code to improve gameplay functionality.

### **Food Hunter**

**Jan 2019 – Apr 2019**

#### *Special Topics in Web and Mobile Application Development*

*KPU, Surrey, BC*

- Developed a React Native application that provided the user with nearby restaurant recommendations using GPS and Yelp Fusion API.
- Used the API to provide relevant information of nearby restaurants and displayed their location and address to users.
- Implemented a list view page that provided the user with additional information about Yelp restaurants.
- Created a UI that allowed the user to adjust settings such as filtering the distance and types of restaurants preferred.

### **Clothing Store Website**

**Sept 2018 – Dec 2018**

#### *Advanced Web Application Development*

*KPU, Surrey, BC*

- Developed a functional clothing store website using HTML and PHP.
- Implemented an SQL database to store and transfer user information.
- Ensured user account security by using password hashing.
